(OVER)

Little Steel Safes for Savings

The Security Trust Company, 148 East Market Street (immediately east of Law Building), loans to its depositors neat little banks, which the depositors take home. These banks have tumbril devices to prevent any one from "picking" the banks. The banks can be opened only at the Trust Company's office where the keys are kept. This plan helps depositors to overcome a temporary desire to spend part of their savings which they are keeping at home.

A DEPOSIT OF ONE DOLLAR WILL OPEN AN ACCOUNT AND OBTAIN ONE OF THESE BANKS. INTEREST OF THREE PER CENT PER ANNUM ALLOWED MONEY CAN BE WITHDRAWN AT ANY TIME IN ACCORDANCE WITH THE SAVINGS BANK LAW OF INDIANA

Capital Stock, $325,000

SAFE DEPOSIT BOXES $4.00 PER YEAR

The State Life Insurance Company

The leading Life Insurance Company of Indiana.
The most successful company in the world for its age.
The State of Indiana has the custody of all its funds.
As a new company it has a low death rate.
As a young company it can pay large dividends.
As a young company it can accumulate a large surplus.
It pays the largest average dividends of any company in the United States.
It is doing business in forty states and in Canada.
It has stood the critical test of examinations by ten state departments.
It is a company of the policy-holders, for the policy-holders and by the policy-holders.

It has now in force, business amounting to	**$74,440,588**
It has total assets amounting to	**4,126,682**
It owns its home office building, unincumbered worth . .	**1,100,000**
It has a surplus fund of	**605,317**

As an Indiana company it deserves and seeks the support of Indianians.

The State Life Insurance Company does business under the Indiana Compulsory Deposit Law of 1899, which affords the insured and the company a greater degree of protection than is furnished by the laws of any other State.

Every Policy issued by the State Life is secured by a deposit of its net cash value with the State of Indiana.

"NORWAYS"

DR. STERNE'S SANATORIUM FOR NERVOUS DISEASES

"NORWAYS" is strictly a sanatorium for the care and treatment of the sick. It is not a place for persons in search of amusement. The institution is composed of separate buildings and is thoroughly equipped in every particular The grounds are extensive and beautiful The cuisine is excellent. Every method of treatment of known value is employed by skilled attendants. Patients suffering from all forms of nervous disease, rheumatism, kidney troubles, the various drug habits, are accepted. The earlier stages of tuberculosis and other pulmonary maladies and those in need of the "rest cure" are especially treated.

TERMS. All charges are payable weekly, one week in advance. They range from $35 to $60 per week, depending upon necessities of treatment and location of room. Regular sanatorium rates include board, room, nursing, treatment and physician's fees. There are no extra charges, unless a special nurse ($10 to $25 per week) is demanded

The first complete examination is $10, whether a patient remain in the institution or not. Out-door patients will be charged according to the treatment employed.

GARMENTS. Patients should wear comfortable clothing. No finery is advocated. Each person should have a bath or lounging robe.

Every patient must adhere to the printed rules and regulations of the sanatorium. These are posted in proper places about the buildings. No exception will be made to them in any case

N. B. No person should be brought to the institution who is too weak to be safely removed from home. For further information apply to the director. ALBERT E. STERNE, M. D.

Stockholders' Additional Liability, $600,000

The Union Trust Company is organized under a special law which requires a guarantee of ample financial responsibility, and establishes a state supervision. It must be examined twice a year by the Auditor of State, and may be examined at any time he pleases. The safeguards of law thus thrown about it assure correct management. It is authorized to execute all kinds of trusts and is a legal depository for court and trust funds.

Savings Department

Deposits of from one dollar upward are received at any time, on which interest will be paid at the rate of three per cent. per annum, compounded every six months.

HOW TO BUY ENGRAVINGS

STAFFORD ENGRAVING CO
CENTURY BUILDING
INDIANAPOLIS

How to Buy Engravings

By H. H. PARAMORE *

MR. STAFFORD asks me to tell in about two hundred words how to buy designs and engraved plates for commercial use. My formula can be stated in a single paragraph:

> *Take the work to one of the few fully-equipped engraving houses; state specifically the result you want, and hold them responsible for the delivery of that result.*

All that remains to be further explained is what constitutes "full equipment" of an engraving house. Here it is:

1. Experienced management by practical men who have the commercial sense to understand what your cuts are to be used for, and why they must be made in a certain way.

2. An art staff of such varied talents that every job taken in will go to the hands of a specialist in that particular class of work. There are no "all-round" men in commercial art. One excels in lettering, another in scrolls or figures, another in mechanical subjects—and so on. It takes seven kinds of skill to capably cover the ordinary run of work that comes to a general engraving house.

3. There must be an expert in charge of each of eight divisions of the operating department, and each of these must have the latest machinery and appliances. Not more than twelve houses in the whole country outside of New York City have such men and such machinery throughout.

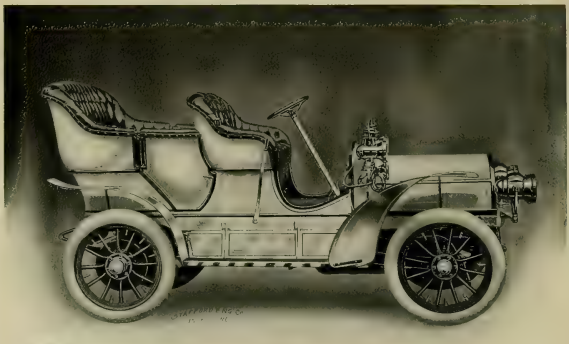
4. Before delivery of any plate it must be inspected and judged from the standpoint of the *printer*. The etching, whether on copper or zinc, must be deep, with every line sharp and clear. Mounting must be gauged to precise type height, and trimmed to some multiple of "six points" (nonpareil).

5. Complete facilities and expert knowledge of the production of color plates. An engraving plant not equipped for the manufacture of perfect printing plates for all the color processes is not "modern" and is not likely to give a uniformly good result in one-color plates.

Any house that can qualify under all of these five requirements can reasonably be expected to give prompt service at fair prices: for the best of men and the new appliances admit of the production of the maximum of good work in the minimum of time. ¶ TIME is what we are charged for when we buy engravings. Men of the highest skill, whether in art room or shop, are paid the top price for their time, but they invariably do more work in a given time than those of mediocre talent. For this reason you will usually find the first cost of the finest work surprisingly moderate. On the other hand, when you pay the bill for an inferior plate, your expense has only begun. The printer loses time in trying to "bring it out," and after all his efforts it can never show the result of a plate perfectly made. So the problem of "How to Buy Engravings" is to be solved by the application of this simple rule:

> *Go to the good house, demand the best, and see that you get it.*

---



* Mr. Paramore, editor of "Bank Notes" and director of the advertising of more than four hundred banks, is a large and discriminating buyer of engravings by every process.

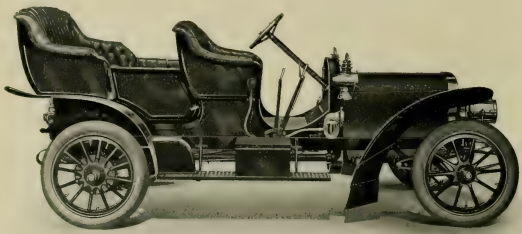
Soldiers and Sailors' Monument : Indianapolis



This is an example of the "Three-Color Process" as perfected by the Stafford Engraving Company. With only three printings a good pressman can produce a result embodying such a variety of tints that it is not possible to count or to name them. The cost of three plates of this size, ready for the printers, is lower, in comparison with the results obtained, than the cost of preparation for any other kind of color printing. To show your products in their natural colors, have plates made by the Stafford "Three-Color Process." Detailed information and estimates on this class of work gladly furnished.

The Art of the Automobile

If you manufacture automobiles you know that a correct and attractive cut of your machine is worth as much to you as a full-sized model of the machine itself. A poor cut is worth less—and worthless. Look again at the auto-portraits on this page; note the boldness and originality of treatment. Cuts like these sell automobiles. Good cuts sell anything.

Cuts Like This Will Sell Your Goods

Our catalog cuts of kitchen cabinets, refrigerators, pianos, furniture and wood goods of all kinds challenge comparison with any work produced in this country. Not only is the work faithful and fine from the purely artistic standpoint, but it embodies the commercial idea—it brings out the SELLING FEATURES of your product, just as a good salesman does. If you want something nice and do not know how to proceed to get it, write to us and we will tell you how to begin—we will help you get results in your cuts that you never dreamed of. The returns from your investment will be equally pleasing to you.

Book Illustration

The accompanying sketch is an example of the prevailing mode of fine book and magazine illustrating as done by the Stafford staff of artists. In the last few years Indianapolis has rapidly grown in importance as a publishing center, and since the United States now looks to this city for its best books it reasonably expects to find here the best illustrations, also.

This same high class of illustrative work meets the demands of the commercial as well as of the literary field. It is now in evidence in the best catalogs, calendars, advertising booklets and blotters—wherever, indeed, the most artistic result is desired. These illustrations are created from authors' suggestions, from artists' ideals, from photographs, paintings, and other sources.

The plates are usually made for two or three printings, and of such precision as to insure perfect register and effective blend of colors.

Many articles of commerce may be reproduced direct by our new color process and all the strength and variety of coloring in the original article retained in our reproduction.

A Fair Specimen of a Half-tone Engraving of a Mechanical Subject

Photography is sometimes, but not always, the basis of a fine engraving of machinery. The best photograph requires a good deal of retouching to bring out the important details, and to distribute the lights and shadows. Often we have no photograph, but must build up the machine from blue prints, rough drawings, description, or our own sketches of the parts of a machine before they are assembled. This can be done only by artists who are themselves mechanics. The mechanical genius in the art studio is about as rare as the artist in a machine shop, but we have several of them who can and will understand every working principle of your machine before they portray it. In the illustration herewith, observe the effective background arrangement, original with us, which helps to give life and sharpness to the important details of mechanism.

YELLOW AND BLACK "STAFFORD DUOTYPE"

Two Color Possibilities

The Stafford Duotype is a modification of the three-color process. It achieves wonderful color results with only two printings, bringing out a surprising variety of tones, tints and shades. For an interior, as in the above picture, the two plates may be printed in black and yellow, producing the many shades of "photo brown." For outdoor views where green is to be the dominant color in the finished print, the work is done in blue and yellow, the result of which is seen in the lower picture. The up-to-date printer finds marvelous possibilities in the Stafford Duotype which, in results, often rivals the three-color process, and at much lower cost. Ask for suggestions.

A Page of Information and Suggestion

FOR BUYERS OF ENGRAVINGS

¶ Mark every piece of copy so as to identify it, and say if you want copy returned. If sent by mail, have your name on outside of package as well as on copy.

¶ Indicate, *in inches*, the exact size cut is to be. Don't say "one-half" or "one-fourth" the size of copy, but how many inches high or wide.

¶ In enlarging or reducing a picture, the relative proportions cannot be changed. If you have a drawing or photograph six inches wide and nine inches high from which you wish to have a cut made two inches wide, the cut will be three inches high, no more, no less.

¶ "Good copy" is especially important in making half-tones. The best photographs for the purpose are "Aristo" and "Brilliant Sun" prints, and they should be toned to a neutral tint, mounted and burnished. They should be sharp in detail, and larger than the engraving is to be. If the copy is very sharp and clear we can make good plates same size as photo, but it is best to have the copy somewhat larger.

¶ We can always, or nearly always, improve a photograph by retouching. Few photos, as they come to us, have enough contrast in them to make the finest printing plates. Outlines need strengthening, shadows deepening, and the high lights retouching for greater contrast. For this work we charge only artist's time, and no exact estimate is possible without inspection of copy. The cost, however, is usually a small item and it is money well spent. A few minutes' retouching on the average photo-copy will transform it from ordinary to exceptionally fine and give you a cut that will be a work of art.

¶ The possibilities of zinc etching are not fully understood and appreciated even by many large users of engravings. This is direct reproduction from prints, drawings, or any other copy that is in clear black lines or dots on white paper, and it can be made larger, smaller, or same size as the original. We can, by this process, reproduce every printed page of a whole book, making plates that will print exactly the same as from the type, and at less cost than typesetting and electrotyping. Zinc etching will reproduce lithographed designs and old prints, wood cuts, etc. It will reproduce booklets, catalogues, etc., in their entirety. It will reproduce newspaper ads, testimonial letters, or any document written or printed in black on white paper.

¶ Do not think it necessary to mark "Rush" on all your copy in order to have it handled with despatch. Every job is put through with all expedition that the nature of the work will admit of. If we seem to be conservative in making time promises, it is not because we want to "side-track" your orders for others, but because we do not want any order hurried to its disadvantage.

¶ Allow two days for a single plate to be made from fair copy requiring no retouching; three to six days if the subject is to be re-drawn. Three-color half-tone work should have at least three weeks for completion. Time required for retouching photographs and wash-drawings will vary according to the extent and character of detail in the job.

¶ Our customers in the printing trade appreciate the time-saving quality of Stafford cuts. Being trimmed to pica standard, and exactly type high, the printer's work of justification and make-ready is quickly done. All etching, being sharp and clear, whether on copper or zinc, accomplishes a great saving of working time on the press, as no stops are required for tedious over-lays and under-lays.

¶ These points are, of course, equally important to the buyer who is not in the printing trade. All cuts eventually go to the printer, and the buyer of printing must pay for time lost in the endeavor to "bring up" poor cuts. An atrocious cut may require longer on the "make-ready" than the whole running time of the job should be. It may easily be seen that good cuts can save pressroom time equivalent to their cost.

An Art to Art Talk

WE are as good in our business as you are in yours. Perhaps you think that is saying a great deal.

But we do know *engraving*. And we know that there is nothing in the line of illustrative work that we cannot do as quickly and capably as any engraving house, East or West, at home or abroad.

We know now that it takes large capital, a variety of talented people, and about as much machinery as a rolling mill to do ALL kinds of engraving in the masterful way that it should be done. The small plant can't do it. We had a little shop in the old days when all process engraving was in the throes of experiment. But we didn't turn down any orders. We tackled anything that came along, and either did it the best we could or sent it off to some larger shop.

Sixteen years have wrought their changes. Now we have more art and less need of artifice. OURS is now the complete plant, and the smaller engraving shops of the Middle West bring their special work to *our* side door.

One of the reasons we have grown, and are still growing, is that we have never ceased to care for the small order of the infrequent customer. The little "fifty-cent etching" has no more chance of being slighted than the mammoth copper plate destined to work in a job of many colors.

You buyer of engraving, see that your name is kept on our mailing list. The information we send will be of real practical value and our specimens will show you who's who in the engraving business.

WE RECEIVE many complaints from our patrons to the effect that they are bothered so much by **BORROWERS.** These parties are not the private citizen nor the stranger in the city, who steps in, looks at the Directory and goes out, but merchants, business and professional men, who need a Directory every day of the year, yet who are too close-fisted to buy one.

These same individuals are the ones that borrow your Directory "just for a minute," which, in the majority of cases, means a day or perhaps a week, unless you remember that they have it and send for it.

These same borrowers will tell the Directory canvasser that he has "no use for a Directory," that he "knows everybody," and, vice versa, "everybody knows him."

AND THE TOOLS FOR KEEPING THEM IN ORDER

Atkins Saws

Are the Finest in Material, Temper, Workmanship and Finish. Every Saw Fully Warranted

Machine Knives of Every Description

BOTH PHONES 55

Office & Salesroom
402 to 406 South Illinois St.

Factory
Illinois, South & Eddy Sts. & Capitol Ave.

INDIANAPOLIS, IND.

ATKINS SAWS

Are made from the highest grade steel and tempered by our patented process. The greatest care is taken in every detail and stage of manufacture. Special machines are used in all departments

NO BETTER SAWS CAN BE MADE

ATKINS HAND SAWS

Are preferred by the best workmen for quality and finish. They cut fast and run easy and will hold a keen cutting edge longer than others. **They "hang" just right, too**

ATKINS BAND SAWS

Are used in all wood-working factories

The Association of American Directory Publishers is composed of reputable City Directory Publishers, organized for the general advancement of the Directory business. Any person, corporation or firm engaged in business as owner and publisher of a City Directory in the United States or Canada, who shall qualify as competent to gather information and compile a City Directory and furnish satisfactory references, is eligible to membership.

The objects of the Association are:

First. The advancement of the Directory business and the improvement of Directories by the interchange of ideas and the exchange of experienced employes.

Second. To provide protection to the public against fraudulent advertising schemes which operate under the name of Directories, and to drive unprincipled promoters of the same out of the business.

Third. To provide permanent and profitable employment to competent, industrious and honest Directory canvassers and compilers.

Fourth. For the mutual protection and advancement of the established and prospective interests of all who may become members, by personal advice and assistance of members as may be mutually satisfactory, desirable or advisable, and by such other means as may, from time to time, be shown to be wise, proper and lawful.

$100.00 Reward Will be paid by the Association for the arrest and conviction of any person or persons engaged in publishing, collecting or canvassing for any fraudulent or fake directory.
